

HEAVY-DUTY DEEP CYCLE TUBULAR BATTERIES IN 2V CELLS, VENTED

From 240 TO 870 AH

FEATURES

- Large Electrolyte Head (104mm), therefore topping up intervals reduced
- Proven Product
- Design proven in local mining houses
- Insulated terminals for safety
- Blocked off end tubes
- Coloured plastic lock nuts prevent reverse assembly
- No-Oxide grease in lock nuts
- Microporous rubber separator
- Separators overlap plates
- Large sediment space
- Deep cycle battery, >1 000 cycles to 80% D.O.D.
- Separator can withstand high and low temperatures without losing porosity
- Easier maintenance
- Less hazardous
- No acid creepage

MODEL SUMMARY:

Model	Nominal Voltage		Capacity (Ah at C100 to 1.8V/cell)			
MT9	2V		240			
MT11	2V		300			
MT13	2V		360			
MT15	2V		420			
MT17	2V		480			
MT19	2V		540			
MT21	2V		600			
MT23	2V		660			
MT25	2V		720			
RT23	2V		800			
RT25	2V		870
